PROFESSIONAL SUMMARY

Senior QA Engineer with 7 years of experience in Manual and Automation Testing across Healthcare, SaaS, Real Estate, and Travel & Hospitality domains. Proven expertise in building scalable test automation frameworks using Cypress, Playwright, and WebdriverIO (TypeScript), delivering up to 40% reduction in manual testing effort. Skilled in Web, API, and Mobile Testing with hands-on experience in REST API validation using Postman, BDD/Cucumber frameworks, and CI/CD integration via GitHub Actions and Bitbucket. Strong collaborator in Agile/Scrum environments with experience leading and mentoring QA teams.

SKILLS

Testing Tools: Playwright (TypeScript), Cypress (TypeScript), WebdriverIO (TypeScript), Postman, Burp Suite, MobSF, Cucumber

Testing Types: Manual Testing, Automation Testing, BDD, Regression, Smoke, Sanity, Exploratory, API Testing, Mobile Testing, Web Application Testing, Cross-Browser Testing, Black Box Testing, Shift-Left Testing

Frameworks & Architecture: Page Object Model (POM), BDD/Cucumber, Test Hooks, Parallel Execution, Reusable Components, CI/CD Integration, Docker

Test Management: JIRA, Zephyr, TestRail – Test planning, execution, defect tracking, RTM, and reporting

CI/CD & Version Control: GitHub Actions, Bitbucket Pipeline, Git – Branching, merging, and automated pipeline integration, Docker

Documentation: Test Plans, Test Strategies, Test Scenarios, Test Cases, Bug Reports, Requirement Traceability Matrix (RTM)

Domains: Healthcare, SaaS, Real Estate, Travel & Hospitality, Enterprise Software

Methodologies: Agile/Scrum, STLC, SDLC, Shift-Left Testing, Sprint Planning, Defect Triage

EXPERIENCE

Senior QA Engineer

July 2025 – Present

CodeLogicx Technologies Pvt. Ltd. | Kolkata, India | Domain: SaaS / Project Management Platform

- Led end-to-end quality assurance for ZOMA, a B2B SaaS Scoping Intelligence platform automating pre-sales workflows, project scoping, and quote generation for service companies.
- Designed and maintained automated test scripts using Playwright (TypeScript) with BDD/Cucumber framework, improving test execution speed and coverage across critical user journeys.
- Developed comprehensive test strategies, test plans, and test scenarios aligned with business requirements and Agile sprint goals.
- Performed REST API testing using Postman, validating request/response payloads, authentication flows, and integration endpoints.
- Integrated automated test suites into CI/CD pipelines via Bitbucket, enabling continuous quality checks on every build.
- Managed test cases and execution cycles in Zephyr, maintaining complete traceability between requirements and test coverage.
- Tracked and triaged defects in JIRA, collaborating with developers for root cause analysis and timely resolution.
- Executed regression, smoke, cross-browser, and exploratory testing across Web and API layers before every major release.
- Contributed to ~40% reduction in manual testing effort through automation framework expansion and reusable component design.

QA Engineer

January 2023 – July 2025

Itobuz Technologies Pvt. Ltd. | Kolkata, India | Domains: Healthcare | Real Estate | Travel & Hospitality

- Designed and executed 100+ manual and automated test cases, contributing to a 30% reduction in post-release defects and enhanced product stability.
- Led automation efforts using Playwright and Cypress (TypeScript) with BDD/Cucumber, building reusable test components and increasing coverage across key modules.

- Developed end-to-end tests using Playwright to validate complex user workflows across browsers, improving UI regression coverage and reducing testing cycle time.
- Performed REST API testing using Postman, validating 100+ API endpoints, authentication flows, and data integrity across integrated services.
- Integrated automated test suites into CI/CD pipelines via GitHub Actions and Bitbucket, enabling shift-left testing and faster release cycles.
- Managed Docker-based test environments to ensure consistent and reproducible test execution across CI/CD pipelines.
- Managed test cases in TestRail and Zephyr; tracked and resolved defects in JIRA with detailed root cause analysis.
- Led and mentored a 6+ member QA team, establishing testing best practices and automation standards, resulting in a 20% increase in team efficiency.
- Collaborated cross-functionally with developers, PMs, and business analysts, ensuring 100% on-time delivery across multiple concurrent project releases.
- Reduced client-reported bugs by 25% through proactive defect analysis and transparent stakeholder reporting.

Test Engineer

June 2019 – December 2022

Inceptial Infrastructure & Technology LLP | Kolkata, India | Domain: Client-Based Enterprise Software

- Performed end-to-end manual testing on web and mobile applications for multiple clients, identifying critical bugs early and improving release quality across platforms.
- Designed and executed test cases based on detailed functional specifications, enhancing test coverage and reducing post-production issues.
- Prepared detailed test plans and aligned test execution with client requirements, ensuring high compliance with acceptance criteria and timely delivery.
- Logged and tracked 200+ defects using JIRA, facilitating faster resolution cycles and improving team responsiveness.
- Maintained complete Requirement Traceability Matrix (RTM) across 30+ modules, reducing missed requirements by 25%.
- Created and shared test summary reports with developers and project managers, reducing turnaround time by 20%.
- Trained and mentored 5+ QA interns, enabling faster ramp-up and improving team scalability during critical project phases.
- Worked within Agile methodology, contributing to sprint-based testing cycles and cross-team collaboration.

PROJECTS

ZOMA – Scoping Intelligence & Pre-Sales Automation (July 2025 – Present)

Codelogicx Technologies | SaaS | B2B | Pre-Sales Automation

A B2B SaaS platform that automates pre-sales workflows, project scoping, and quote generation for service companies. Led end-to-end QA including automation with Playwright (TypeScript) + BDD/Cucumber, REST API testing via Postman, CI/CD integration via Bitbucket pipeline, and test management in Zephyr. Contributed to ~40% reduction in manual testing effort.

NexStay – Hotel Management Platform (January 2025 – July 2025)

Itobuz Technologies | Travel & Hospitality | SaaS

A robust hotel management SaaS platform streamlining booking, billing, and customer service operations. Responsible for end-to-end testing and API validation, ensuring 95% functional accuracy pre-release. Automated cross-browser testing using Playwright (TypeScript) and Cypress with BDD/Cucumber. Validated 120+ APIs using Postman. Performed Web, Regression, and Cross-browser Testing across platforms.

Spoon – Restaurant Operations Platform (February 2024 – November 2024)

Itobuz Technologies | Food & Beverage | SaaS

A web and mobile application optimizing restaurant operations including online ordering and customer feedback management. Led comprehensive testing cycles increasing test coverage by 35% and reducing manual testing effort by 40% through automation with Cypress + BDD/Cucumber. Validated 100+ APIs using Postman across all modules.

Pretaa – Healthcare SaaS Platform (January 2023 – February 2024)

Itobuz Technologies | Healthcare | SaaS

A SaaS platform tracking health data for individuals with addiction, with real-time alerts for critical events. Tackled high-risk security and data integrity challenges via multi-environment API testing and vulnerability scans using MobSF. Automated 80% of test cases using Cypress and WebdriverIO (TypeScript) with BDD/Cucumber, improving release efficiency and maintaining consistent quality performance.

Teexma – Enterprise Data Management System (June 2019 – December 2022)

Inceptial Infrastructure | Enterprise Software

An enterprise-grade data management system serving multiple industries. Conducted rigorous regression testing across evolving client requirements. Maintained a complete Requirement Traceability Matrix (RTM) across 30+ modules and aligned test strategies with changing business priorities, reducing missed requirements by 25%.

EDUCATION

B.Tech in Computer Science & Engineering

2016 – 2019

West Bengal University of Technology (MAKAUT)

Diploma in Computer Science & Technology

2013 – 2016

West Bengal State Council of Technical Education
